

Dr. Mohammad Samim is a fellowship-trained musculoskeletal radiologist and an Associate Professor of Radiology at NYU Langone Health, New York. He completed his diagnostic radiology residency at Yale University School of Medicine and pursued a fellowship in MSK imaging and intervention at Brigham and Women's Hospital, Harvard Medical School.

Dr. Samim has authored numerous peer-reviewed articles, scientific abstracts, book chapters and delivered more than 100 national and international conference presentations. He currently serves as an Associate Editor and Editorial Board Member for *Skeletal Radiology* and is a recipient of multiple "Reviewer Award with Distinction" honors. In addition, he reviews for several other leading radiology and orthopedic journals. His clinical expertise includes musculoskeletal tumor imaging, image-guided interventions, post-operative imaging, and evaluation of procedural outcomes. In addition to his academic work, Dr. Samim is actively involved in several professional societies and committees. He has contributed to the development of several practice parameters for radiology societies and currently serves as a member of ACR Appropriateness Criteria expert panel.

"Being selected for the ISS Founders' editorial fellowship is both a great honor and a significant milestone in my academic career. It affirms my dedication to enhancing the quality and precision of scientific communication in musculoskeletal radiology," said Dr. Samim. "This opportunity to engage closely with the editorial process at a high level will not only deepen my understanding of what constitutes impactful research but also equip me with the tools to mentor colleagues and contribute meaningfully to the advancement of radiologic scholarship. I am eager to learn from the editorial team at *Skeletal Radiology* and to apply these insights toward furthering the fields of musculoskeletal imaging and intervention."
